INSTRUCTION FOR USE OF **ABC MULTIPURPOSE DRY POWDER (STORED PRESSURE TYPE) FIRE EXTINGUISHER**

Fires are categorised into different classes with a different extinguisher to fight each type of fire. An untrained person is expected to look at the fire, evaluate and then proceed to fight. At the time of crisis, this can cause confusion, wasting of time and be extremely dangerous.

If a Class A extinguisher, which is water based, is used on an electrical fire, it can lead to instant electrocution. If a Class A extinguisher is used on an oil/petrol based fire, the oil will float on water and the fire will instantly spread out. If a Class B/C extinguisher is used on a class A fire, it will have no effect whatsoever.

THE ABC EXTINGUISHER ACTUALLY WORKS ON ALL CLASSES OF FIRE

		CARBONACEOUS MATERIAL LIKE WOOD, PAPER, CLOTH, TRASH & OTHER ORDINARY MATERIALS.
		PETROLEUM PRODUCTS, SOLVENTS, PAINTS & OTHER INFLAMMABLE LIQUIDS.
		INFLAMMABLE GAS, LIQUID LIKE LPG GAS, PETROL, PAINTS, GREASE & ELECTRICALLY STARTED FIRES.

EASY PULL TO UNLOCK

THE ABC EXTINGUISHER EASY TO USE

Just pull the safety pin & then press the lever down-a-simple two-step activation process. It also has a unique controllable discharge mechanism.

By simply pressing down and releasing the lever, the flow of the extinguishing agent can be controlled, allowing the user to fight multiple fire points without wasting precious extinguishing agent.

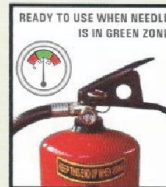

TECHNICAL SPECIFICATION

CONTENTS : ABC Powder
(Mono Ammonium Phosphate base)
CAN CONSTRUCTION : Mild Steel
PRESSURIZED BY : Nitrogen

Description	BIS spec.	Discharge Time (Sec.)	Jet Length (Meters)	Testing Pressure	Special Features
ABC-1 Kg.	15683	8-12	3-4	30Kg/Cm ²	
ABC-2 Kg.	15683	10-15	3-4	30Kg/Cm ²	
ABC- 4 Kg.	15683	15-20	3-4	30Kg/Cm ²	
ABC- 9 Kg.	15683	20-25	3-5	30Kg/Cm ²	

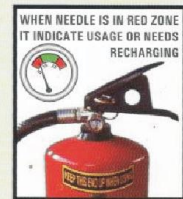

IT IS A ZERO MAINTENANCE FIRE EXTINGUISHER

Other extinguisher require quarterly/annually maintenance, checks and costly annual replacement of working parts and extinguisher agents to ensure that they stay in working condition. The annual cost of maintaining an extinguisher is as much as 50% of the cost of the extinguisher.

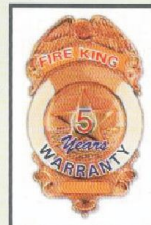

READY TO USE WHEN NEEDLE IS IN GREEN ZONE

The FIRE KING ABC extinguisher has a unique pressure gauge that indicates whether it is in working condition or not. If the needle is in green zone, it shows, it is in working condition.

WHEN NEEDLE IS IN RED ZONE IT INDICATE USAGE OR NEEDS RECHARGING

If the needle is in red zone, it indicates that the fire extinguisher has been used or it needs to be recharge. Thus maintenance is restricted to the observation of this gauge which saves recurring costs.

THE ABC EXTINGUISHER COMES WITH 5 YEARS WARRANTY

This covers all functional aspect of the product including leakage. Powder consistency and construction of the cylinder. Any replacements or refilling, except for actual use are done free of the cost.

THE MANUFACTURING PROCESS OF FIRE KING FIRE EXTINGUISHER ENSURE THAT EVERY CYLINDER IS 100% SAFE AT ALL TIMES
